

# Arrival manager for EuroScope

A simple arrival manager plugin for EuroScope. Uses the position predictions provided by EuroScope to visualize the arrival flow for a given airport or waypoint.

## Usage

The AMAN-display will appear in a separate window once the plugin has been loaded.

- `.aman show` opens window if it's been closed.

## Add a timeline

- `.aman add WAYPT1` adds a timeline for a single waypoint.
- `.aman add WAYPT1/WAYPT2` adds a timeline shared by two waypoints, where aircraft inbound for WAYPT1 are shown on the left side and inbounds to WAYPT2 are shown on the right side.
- `.aman add WAYPT1 30` adds a timeline showing a 30 minute large window (default is 60 minutes).

## Remove a timeline

- `.aman del WAYPT1` OR `.aman del WAYPT1/WAYPT2`
